

# PRODUCT PICTURE

## WHAT'S THE BEST RESOLUTION?

We suggest when you take a picture of a product, you frame the item you want to capture in the center. This makes sure that whenever you upload a product on EasyOrder your product will be seen perfectly on every device. Below are some specifications your image should follow.

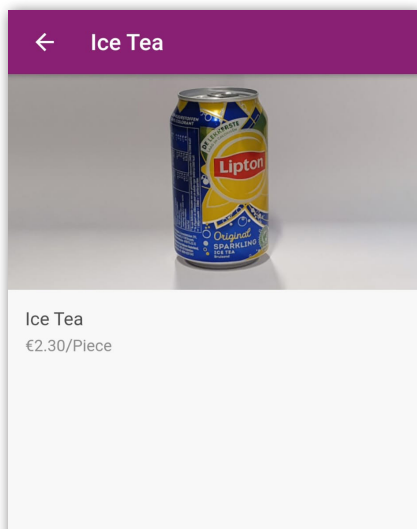

### Step 1: Take the picture

**Step 2:** Crop the picture to a resolution of 1500 x 750 pixels (you can also take a picture of 1500 x 750 immediately). This is shown in the picture above as the **green** frame. When doing this, bare in mind to keep enough margins alongside the product so that the purple & orange frame doesn't cut into the item.

### Step 3: Make it fit in the **app** & **website**.

The **purple** frame shows the view of the product picture on the **webstore**, on your **desktop**. The **orange** frame shows the view of the product picture in the **app**, on your **phone**.
